Four things to skip (and save)

- ✗ Expensive branded cable-management kits — \$2 magnetic clips plus \$2 velcro ties handle almost everything.
- ✗ A whole new standing desk before the basics — a laptop stand and a monitor riser fix most neck strain for under \$25.
- ✗ RGB overload if you actually want to focus — buy lighting that helps your eyes first, mood lighting second.
- ✗ No-name chargers and hubs — pick ones with thousands of reviews (the PowerDock has 10,000+ sold).
